

SSMS User Manual

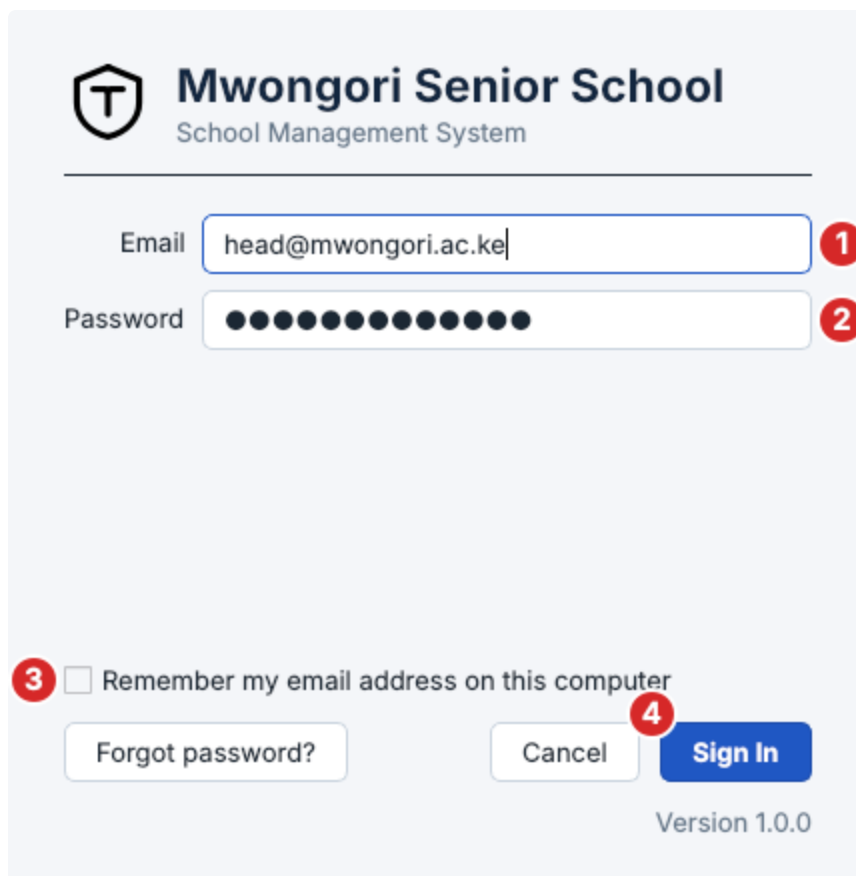

Oct 9, 2026 · @solomon nyangena

Before you start

This manual covers the six jobs most staff do every term, in the order they are normally done: admit the students, put them in classes, create the examination, enter the marks, read the broadsheet, and print the report forms. Each section has pictures of the screen with red numbers on them. The numbered steps under each picture match those red numbers.

The pictures use a demonstration school with made-up students, so the names and marks are not real.

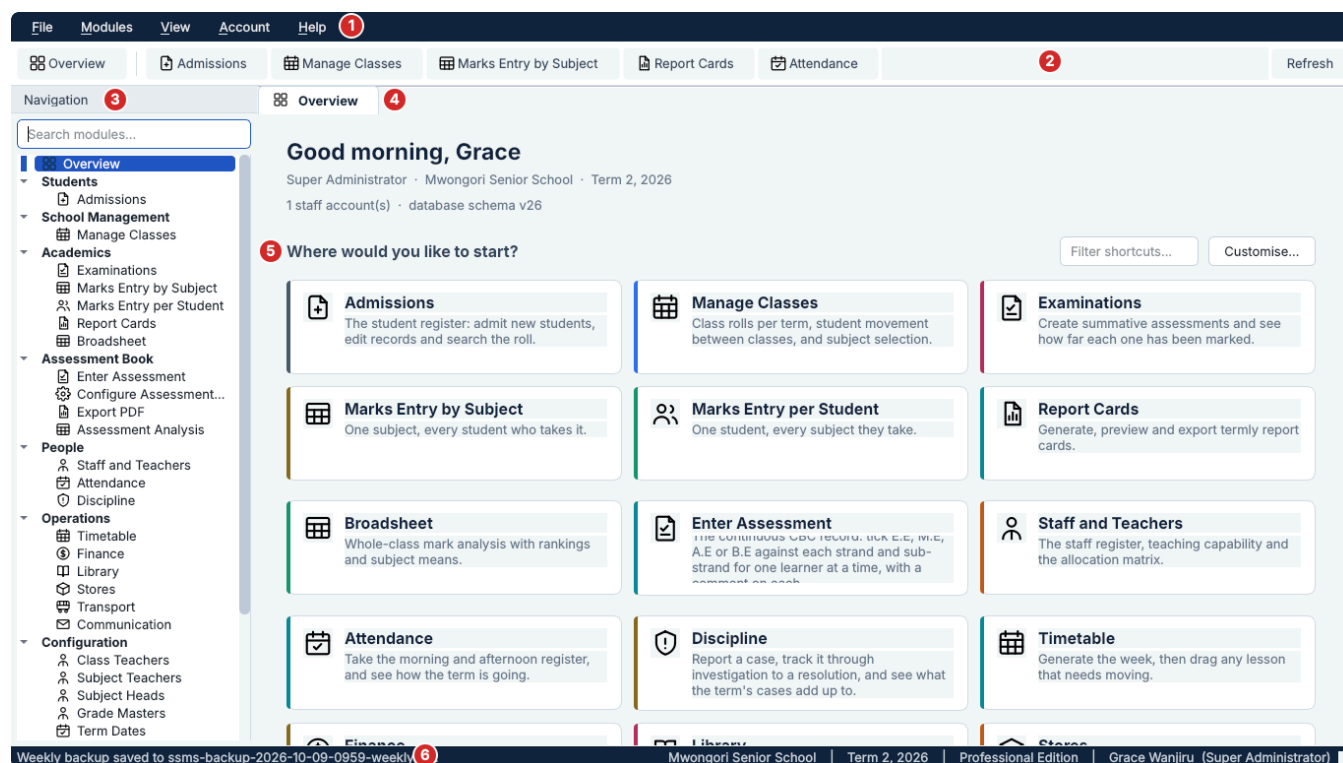

Signing in

1. Type the email address your administrator gave you.
2. Type your password.

3. Tick **Remember my email address on this computer** if you are the only person who uses this computer. Your password is never remembered.
4. Click **Sign In**. If you have forgotten your password, click **Forgot password?** instead.

Finding your way around

1. **Menu bar.** Every module is also listed under **Modules**.
2. **Toolbar.** One-click buttons for the screens used most. **Refresh** reloads the screen you are on.
3. **Navigation panel.** All modules, grouped by area. Type in **Search modules...** to find one quickly.
4. **Tabs.** Each module you open gets its own tab, so you can keep several open and switch between them. Click the small **x** on a tab to close it.
5. **Shortcut cards.** Click a card to open that module.
6. **Status bar.** Shows the school, the current term and year, and who is signed in. Short messages about what the program has just done also appear here.

Check the term and year in the status bar before you start work. Class lists, examinations and reports all follow the current term.

You only see the modules your account is allowed to use. If one is missing, ask your administrator.

Admissions

Admissions is the student register. Use it to admit a new student, correct a record, add passport photographs and find any student quickly.

Open it from **Admissions** on the toolbar, or **Students > Admissions** in the Navigation panel.

The student register

The screenshot shows the SSMS Admissions interface. The top menu bar includes File, Modules, View, Account, and Help. The toolbar contains buttons for Overview, Admissions, Manage Classes, Marks Entry by Subject, Report Cards, and Attendance. The left navigation panel lists various modules under categories like Students, School Management, Academics, Assessment Book, People, Operations, and Configuration. The main area displays the 'Admissions' tab with a search box, filters for Grade, Stream, and Status, and a table of student records. Red numbered callouts (1-5) highlight key features: 1. Admit Student button, 2. Edit button, 3. Delete button, 4. Search box, and 5. Filter dropdowns.

Adm. No.	Student Name	Gender	Class	House	UPI	Assessment No.	Parent / Guardian	Phone	Status
8001	Faith Atieno	Female	Grade 10 North				Mr. Joseph Atieno	0762221816	On roll
8002	Brian Kiprono	Male	Grade 10 South				Mrs. Agnes Kiprono	0733605040	On roll
8003	Mercy Kemunto	Female	Grade 10 East				Mr. David Kemunto	0712405829	On roll
8004	Kevin Nyaboke	Male	Grade 10 North				Mrs. Rose Nyaboke	0766147152	On roll
8005	Brenda Nyamweya	Female	Grade 10 South				Mr. Charles Nyamweya	0732623754	On roll
8006	Peter Omondi	Male	Grade 10 East				Mr. Joseph Omondi	0785282118	On roll
8007	Jane Cherono	Female	Grade 10 North				Mrs. Agnes Cherono	0795471766	On roll
8008	Dennis Kerubo	Male	Grade 10 South				Mr. David Kerubo	0774617661	On roll
8009	Mary Bosire	Female	Grade 10 East				Mrs. Rose Bosire	0724936831	On roll

8014	Samuel Mutai	Male	Grade 10 South				Mrs. Rose Mutai	0730920275	On roll
8015	Purity Mogaka	Female	Grade 10 East				Mr. Charles Mogaka	0719486556	On roll

Showing 1-50 of 51 student(s)

Weekly backup saved to ssms-backup-2026-10-09-0959-weekly.zip. Mwongori Senior School | Term 2, 2026 | Professional Edition | Grace Wanjiru (Super Administrator)

1. **Admit Student** opens a blank form for a new student.
2. **Edit** opens the record of the student you have selected in the list. Double-clicking a student does the same. **Delete** removes the record for good, so use it only for a record entered by mistake.
3. **Import Photos** adds passport photographs for many students at once.
4. **Search box**. Type part of a name, an admission number or a UPI. The list narrows as you type.
5. **Filters**. Show one grade, one stream, or change **Status** from *On roll* to *Left* or *All*.

The list shows 50 students per page. Use **Previous** and **Next** at the bottom to move between pages.

Admitting a new student

Click **Admit Student**. The form has three columns. Work from left to right. Fields marked with a star (*) must be filled in.

Admit a Student

Fields marked * are required. Work left to right: who the student is, where they are placed, then guardian and previous school.

6 Admit Student Cancel

- Passport photo.** Click **Choose...** and pick the picture. You do not need to resize it first: a large picture is turned upright, reduced to passport size and kept under 1 MB for you. It is saved under the student's admission number, for example `8052.jpg`. **Remove** takes the photo off again.
- Admission no.** Type the admission number. No two students can share one.
- Next** fills in the next free admission number for you.
- Placement.** Choose **Grade admitted** and **Stream admitted**. These record where the student joined the school. The class for this term is set in Manage Classes (next section).
- Junior school record.** Enter the **KJSEA marks** (0 to 72), the **KJSEA year** and the **KJSEA assessment no.** if you have them.
- Fill in the guardian's name and phone in the third column, then click **Admit Student**.

If something is missing or wrong, the form tells you which field to fix and nothing is saved until you correct it.

To change a record later, select the student, click **Edit**, make the change and click **Save Changes**.

When a student leaves the school, do not delete the record. Open it with **Edit** and fill in **Date of leaving** in the third column. The student moves from *On roll* to *Left* and all their history is kept.

Adding photographs for many students at once

Before you start, put the pictures in one folder and name each one after the student's admission number, for example **8013.jpg**. Then click **Import Photos**.

Import Student Photographs

Name each picture after the student's admission number - for example 1024.jpg. Every picture is turned upright, resized to passport size, compressed to stay under 1.0 MB and saved as <admission number>.jpg. Your original files are not changed.

☐ Include subfolders

Picture file	Admission no.	Student	Class	Size	Status
8013.jpg	8013	Lilian Makori	Grade 10 North	36 KB	Ready
8014.jpg	8014	Samuel Mutai	Grade 10 South	35 KB	Ready
8015 Brian.jpg	8015	Purity Mogaka	Grade 10 East	34 KB	Ready - check the name
8003.jpg	8003	Mercy Kemunto	Grade 10 East	36 KB	Will replace
8016.jpg	8016	Ian Ondieki	Grade 10 North	36 KB	Ready
8013_old.jpg	8013	Lilian Makori	Grade 10 North	35 KB	Duplicate
IMG_2041.jpg				34 KB	No matching student

8013.jpg
8013 - Lilian Makori
Grade 10 North

7 pictures: 4 ready, 1 will replace, 1 with no matching student, 1 duplicate. 1 was matched on the start of its file name - check it before importing.

☒ Replace photographs already on file

Photographs on file for 12 of 51 students on roll. Stored in C:\ProgramData\SSMS\photos\students

1. Click **Choose Folder...** and pick the folder. Tick **Include subfolders** if the pictures are in folders inside it. **Choose Files...** lets you pick single pictures instead.
2. **Check the list.** Each picture is matched to a student. Nothing has been saved yet. Click a row to see the picture on the right.
3. **Replace photographs already on file.** Leave this ticked if the new pictures should replace old ones. Untick it to keep the old ones.
4. Click **Import** to save the photographs. Your original pictures are not changed.

5. Students Without Photographs... saves a list of students who still have no photo, so you know who to call for a retake.

What the **Status** column means:

Status	Meaning	What to do
Ready	The file name matches a student.	Nothing.
Ready - check the name	Only the start of the file name matched, for example 8015 Brian.jpg.	Look at the student's name and the picture before importing.
Will replace	The student already has a photo.	Nothing, unless you want to keep the old one.
Duplicate	Two pictures match the same student. One is used and this one is skipped.	Nothing, unless the wrong one was picked. Then rename the files and choose the folder again.
No matching student	The file name is not an admission number.	Type the correct admission number in the Admission no. column of that row.

Photographs appear on the student's record and on their report form.

Manage Classes

Admitting a student puts them in the register. Manage Classes puts them in a class for a particular term and records which subjects they take. Both must be done before marks can be entered: a student with no class and no subject combination does not appear on any mark sheet.

Open it from **Manage Classes** on the toolbar.

Putting students in a class

The screenshot shows the 'Manage Classes' interface in the SSMS application. The left sidebar contains a navigation menu with categories like Overview, Students, School Management, Academics, Assessment Book, People, Operations, and Configuration. The main area is titled '2026 Term 2 - Grade 10 North' and displays a table of students. The table has columns for #, ADM NO, NAME, GRADE, STREAM, TRACK ID, and PATHWAY. The 'STREAM' column shows 'North' for all students, and the 'PATHWAY' column shows 'STEM' and 'SOCIAL SCIENCES'. A 'Move' button is next to each student's name. On the right, a panel titled 'Step 2 - Assign Students to Grade' allows users to select students, set the grade and stream, and click 'Assign Selected'. The bottom status bar shows '16 student(s) on the roll'.

#	ADM NO	NAME	GRADE	STREAM	TRACK ID	PATHWAY
1	8046	Alex Mutai	10	North	211	STEM
2	8022	Alex Omondi	10	North	211	STEM
3	8034	Collins Kiprono	10	North	75	SOCIAL SCIENCES
4	8010	Collins Kwamboka	10	North	75	SOCIAL SCIENCES
5	8043	Esther Chebet	10	North	211	STEM
6	8019	Esther Kemunto	10	North	74	SOCIAL SCIENCES

1. **Choose the class.** Set **Year**, **Term**, **Grade** and **Stream**. The list below shows who is in that class this term.
2. **Step 2 - Assign Students to Grade.** This panel lists students who have been admitted but have no class this term.
3. Choose the **Grade** and **Stream** in the panel, tick the students (or click **All**), then click **Assign Selected**. They move into the class list on the left.
4. **Move** takes one student to another stream or grade. You can type a reason, which is kept in the history.
5. The count at the bottom tells you how many students are on the roll for the class you are looking at.

If you already have a list of admission numbers, open the **Bulk Import** tab in the panel, type the numbers separated by commas and click **Bulk Assign**.

Giving each student a subject combination

Scroll the class list to the right to see the rest of each row.

- **TRACK ID.** Type the number of the student's subject combination. The pathway and the full list of subjects appear straight away, and the change saves itself after a moment.
- **PATHWAY** and **ALL SUBJECTS** show what that combination gives the student.
- **ACTIONS.** The red x removes the student from this class. The record is kept and marked as withdrawn, so the term's history stays correct. Tick **Show withdrawn** above the list to see them again.

To set the same combination for many students, use the **Subjects** tab.

1. Pick a **Combination** from the list.
2. Select a student in the table and click **Apply to Student**.
3. Or click **Apply to Whole Class** to give it to everyone in the class. You are asked to confirm first.
4. The line at the bottom shows how many students have a combination. The **Who takes what** table on the right counts the students in each subject.

Before any examination, check that this line reads "16 of 16" (all of the class). A student with no combination is left out of the mark sheets.

Year: 2026 Term: Term 2 Grade: Grade 10 Stream: All streams

Students Overview **Classes** Subjects Term Comparison History

Every class in the selected term and how many students are in it. Double-click a class to see who they are.

Grade	Stream	Students	Withdrawn
Grade 10	East	16	0
Grade 10	North	16	0
Grade 10	South	16	0

2026 Term 2: 48 student(s) in 3 class(es).

Weekly backup saved to ssms-backup-2026-10-09-0959-weekly.zip Mwongori Senior School | Term 2, 2026 | Professional Edition | Grace Wanjiru (Super Administrator)

Tab	What it shows
Overview	Number of students in each grade and each stream.
Classes	Every class in the term and how many students are in it.
Term Comparison	How each class grew or shrank between two terms of the same year.
History	Every change to a student's class, with who made it and when.

- Roll Term Forward...** copies this term's class lists into another term, with the same grades and streams. Use it at the start of a new term so you do not have to assign everyone again. Students already in the new term are left alone, so it is safe to run twice. It does not promote anyone to the next grade.
- Print / Export PDF...** prints a class list, the student population by class, a term comparison, student movement, or subject and pathway statistics. Choose a grade first if you want a class list.

Examinations

An assessment is one examination for one grade in one term, for example "End of Term 2 Examination" for Grade 10. You create it once here. After that, marks are entered against it, and the broadsheet and report forms are produced from it.

Open it from **Academics > Examinations** in the Navigation panel.

Examinations
Create an assessment here, then record marks from Marks Entry.

1 Create Assessment 2 Enter Marks 3 Delete

Year: All Term: All

Assessment	Type	Date	Subjects marked	Marks recorded

Mid Term 2 Examination	End of Term Examination	Grade 10 - 2026 Term 2 12 Jun 2026	13	322

2 assessment(s).

Weekly backup saved to ssms-backup-2026-10-09-0959-weekly.zip. Mwongori Senior School | Term 2, 2026 | Professional Edition | Grace Wanjiru (Super Administrator)

1. **Create Assessment...** sets up a new examination.
2. **Enter Marks** opens Marks Entry for the assessment you have selected in the list.
3. **Delete** removes the selected assessment **and every mark recorded against it**. This cannot be undone. You are asked to confirm, and the message tells you how many marks will be lost.
4. **The list.** Each row is one assessment. **Subjects marked** and **Marks recorded** show how far marking has gone. Use the **Year** and **Term** filters above the list to see other terms.

Creating an assessment

Click **Create Assessment....**

Create New Assessment

Set up an assessment for a grade and term.

Assessment Details

1. Assessment title * End of Term 3 Examination 2026

Assessment type End of Term Examination

Assessment date 9 October 2026

2. Grade * Grade 10

3. Term * Term 3

Year * 2026

4. Stream All streams

Description Notes about this assessment...

How it works

1. Create the assessment with a grade and term
2. Open **Marks Entry by Subject** and pick a subject
3. Enter a mark for each student who takes it
4. Repeat for the other subjects
5. Generate report cards

Subjects come from each student's own selection, so a marks grid only lists the students who actually take that subject.

5

Create Assessment

Cancel

1. **Assessment title.** Give it a clear name that includes the term and year, for example "End of Term 3 Examination 2026". This title is printed on the broadsheet and on every report form.
2. **Grade.** Choose the grade that sat the examination. Also choose the **Assessment type** (End of Term Examination, Mid-Term Examination, Mock Examination or Continuous Assessment Test) and the **Assessment date**.
3. **Term and Year.** These start on the current term. Change them only if you are setting up an examination for another term.
4. **Stream.** Leave it on **All streams** for an examination the whole grade sat. Choose one stream only if just that stream sat it.
5. Click **Create Assessment**.

You do not choose subjects here. Each student is marked in the subjects of their own combination, which you set in Manage Classes.

Create one assessment per grade. If Grade 10 and Grade 11 both sit an end-of-term examination, create two assessments.

Marks Entry per Subject

This is the screen a subject teacher uses: pick one subject and enter the score of every student who takes it.

Open it from **Marks Entry by Subject** on the toolbar, or select the assessment on the Examinations page and click **Enter Marks**.

Step 1: choose the assessment and the subject

The screenshot shows the SSMS interface for 'Marks Entry by Subject'. The top toolbar includes tabs for Overview, Admissions, Manage Classes, Marks Entry by Subject, Report Cards, and Attendance. The 'Marks Entry by Subject' tab is active. The sidebar on the left contains a navigation menu with categories like Students, School Management, Academics, Assessment Book, People, Operations, and Configuration. The main content area is titled 'Pick a Subject' and includes a 'Marks Entry Progress' section. The 'Assessment' dropdown is set to 'End of Term 2 Examination - Grade 10 - 2026 Term 2'. The 'Marks Entry Progress' section displays a grid of subject cards with their respective student counts and progress status (green for completed, orange for started).

Subject	Progress
Agriculture	28/28 students (Green)
Biology	10/10 students (Green)
Building Construction	9/9 students (Green)
Business Studies	46/46 students (Green)
Chemistry	5/9 students (Orange)
Computer Studies	9/9 students (Green)
Core Mathematics	27/28 students (Orange)
CSL	46/46 students (Green)
English	46/46 students (Green)
Essential Mathematics	18/18 students (Green)
History & Citizenship	18/18 students (Green)
Kiswahili	46/46 students (Green)

- Assessment.** Choose the examination you are marking. Check the grade and term shown beside it.
- Marks Entry Progress.** One card per subject, showing how many students have been marked out of how many take the subject. Green means every student is marked. Orange means marking has started but is not finished.
- Click a subject** on a card, or in the list on the left, to open its mark sheet. In the list, a tick means finished and a ring means started.

Step 2: enter the scores

The screenshot shows the SSMS Marks Entry by Subject interface. The sidebar on the left contains navigation options like Overview, Students, School Management, Academics, Assessment Book, People, Operations, and Configuration. The main area displays the 'End of Term 2 Examination - Grade 10 - 2026 Term 2' assessment. A list of subjects is shown on the left, with 'Core Mathematics' selected. The main table lists students with columns for Adm, Score %, and Grade. Red numbers 1 through 5 highlight key features: 1. 'All subjects' button, 2. Stream selection buttons, 3. Student table, 4. 'Fill Empty...' button, 5. 'Save Marks' button.

Student	Adm	Score %	Grade
Felix Kiprono (East)	8018	68	ME1
Felix Kwamboka (East)	8042	27	AE2
Joyce Nyamweya (East)	8021	62	ME1
Mary Atieno (East)	8033	74	ME1
Mercy Chebet (East)	8027	40	AE1
Mercy Kemunto (East)	8003	59	ME1
Peter Omondi (East)	8006	26	AE2
Victor Moraa (East)	8012	40	AE1
Victor Nyaboke (East)	8036	69	ME1
Alex Mutai (North)	8046	44	ME2
Alex Omondi (North)	8022	-	
Esther Chebet (North)	8043	25	AE2

1. **All subjects** takes you back to the progress board.
2. **Stream.** Click a stream to see only that stream. This is useful when each stream has its own teacher. The number on each button is how many students take the subject.
3. **Type the score** as a percentage (0 to 100) in the **Score %** column. The grade appears beside it as you type, so you can check it against the grading key above the table. Press **Tab** to move to the next student.
4. **Fill Empty...** puts one score into every row that has no mark yet. **Clear** empties the whole sheet on the screen.
5. Click **Save Marks**. A message in the status bar tells you how many marks were saved.

Things to remember:

- **Nothing is kept until you click Save Marks.** If you move to another subject with unsaved scores, you are asked whether to save them.
- **A blank box means "no mark", not zero.** Leave it blank for a student who did not sit the paper. Type 0 only if the student scored zero.
- **To correct a score,** open the subject again, type the new score over the old one and save.
- **To remove a score,** delete it from the box and save.

- **Only students who take the subject are listed.** If a student is missing from the sheet, they have no class this term or the subject is not in their combination. Fix that in Manage Classes, then come back.

If you prefer to enter all of one student's subjects at once, use **Marks Entry per Student** in the Navigation panel. It works on the same marks.

Broadsheet

The broadsheet puts every student and every subject of one examination on a single sheet, with totals, points, grades and ranks. It is built from the marks already entered. There is nothing to type here.

Open it from **Academics > Broadsheet** in the Navigation panel.

Opening a broadsheet

The screenshot shows the SSMS Performance Broadsheet interface. The navigation panel on the left lists various modules, with 'Broadsheet' selected under the 'Academics' category. The main content area is titled 'Performance Broadsheet' and prompts the user to 'Choose an assessment to see its performance analysis.' Two examination cards are displayed: 'End of Term 2 Examination' and 'Mid Term 2 Examination'. Both cards show 'Grade 10', 'Term 2 · 2026', and '46 student(s) with marks'. Each card has a green 'View Broadsheet' button. A red circle with the number '1' highlights the button on the 'End of Term 2 Examination' card, and a red circle with the number '2' highlights the button on the 'Mid Term 2 Examination' card. The footer indicates a weekly backup was saved and shows the school name, term, edition, and administrator.

1. Find the examination and click **View Broadsheet**.
2. If an earlier examination has been chosen for comparison, the card says which one.

Reading the sheet

The screenshot shows the 'Broadsheet' module in the SSMS system. The interface includes a navigation sidebar on the left with categories like Overview, Students, School Management, Academics, Assessment Book, People, Operations, and Configuration. The main area displays the 'End of Term 2 Examination' for 'Grade 10 - 2026 Term 2'. It features filters for 'All Grade 10', 'Stream East', 'Stream North', and 'Stream South'. Below these are options for 'Grading' (Split (EE1, EE2 ... BE2)) and 'Compare with' (Mid Term 2 Examination (Grade 10, Term 2 2026)). Summary statistics show 46 Total Students, 13 Subjects, a Class Average of 54.2%, and a Top Student, Brenda Nyamweya, with 87.1%. A table lists students with columns for Pos, Adm No, Student Name, Str, CSL, English, Kiswahili, Core Mathematics, Essential Mathematics, Agriculture, Biology, and Building Construction. A footer note explains the ranking system: 'Ranked on total points, over the whole grade whichever stream is shown. Ties share a rank and the next rank skips - three students on rank 2 are followed by rank 5. The pathway rank compares a student only with others on their own pathway. A student's grade is read from their average points per subject (Avg Pts). Compared with Mid Term 2 Examination (Grade 10, Term 2 2026): 21 improved, 17 dropped, 8 unchanged, 0 with no earlier result.'

Pos	Adm No	Student Name	Str	CSL	English	Kiswahili	Core Mathematics	Essential Mathematics	Agriculture	Biology	Building Construction
1	8005	Brenda Nyamweya	South	94	86	86	-	82	-	-	-
2	8040	Ian Kerubo	North	63	85	91	-	83	-	-	-
3	8002	Brian Kiprono	South	74	84	72	71	-	79	-	90
4	8031	Jane Mogaka	North	72	77	83	81	-	72	75	-
5	8007	Jane Cherono	North	65	87	63	63	-	76	72	-
6	8017	Diana Atieno	South	86	70	61	68	-	79	-	86
7	8044	Edwin Moraa	South	77	86	65	-	64	-	-	-
8	8029	Brenda Makori	South	80	56	69	-	58	-	-	-
9	8026	Brian Kwamboka	South	58	61	72	67	-	61	-	61

1. **All assessments** goes back to the list.
2. **Stream buttons.** Show the whole grade or one stream. Ranks are always worked out over the whole grade, so a student keeps the same rank whichever stream you look at.
3. **Grading.** Switches between the two grading scales (explained below).
4. **Compare with.** Choose an earlier examination to see whether each student has gone up or down.
5. **Preview / Export PDF** opens the printable broadsheet.

Each row is one student, with one column per subject. In a subject column, a dash (-) means the student does not take that subject, and an X means the student takes it but has no mark.

Scroll the table to the right to see the results columns.

9	-	-	-	-	448	62.7	42	6.00	ME1	5.71	▲ 0.29	5	9

Ranked on total points, over the whole grade whichever stream is shown. Ties share a rank and the next rank skips - three students on rank 2 are followed by rank 5. The pathway rank compares a student only with others on their own pathway. A student's grade is read from their average points per subject (Avg Pts). Compared with Mid Term 2 Examination (Grade 10, Term 2 2026): 21 improved, 17 dropped, 8 unchanged, 0 with no earlier result.

Rankings recorded for 46 student(s). Mwongori Senior School | Term 2, 2026 | Professional Edition | Grace Wanjiru (Super Administrator)

Column	Meaning
Total	The student's marks added together.
Avg%	The average mark across the subjects the student was marked in.
Pts	Total points. Each subject earns points according to its grade.
Avg Pts	Points divided by the number of subjects.
Grade	The overall grade, read from Avg Pts.
Prev Avg Pts	The student's Avg Pts in the examination chosen under Compare with .
Trend	A green arrow up means improved, a red arrow down means dropped, and = means no change. The number is the size of the change.
Pathway Rank	Position among students on the same pathway.
Overall Rank	Position in the whole grade.

How ranking works. Students are ranked on total points, not on total marks. Students with the same points share a rank, and the next rank is skipped. For example: 1, 2, 2, 4, 4, 6.

Choosing the grading scale

The **Grading** box offers two scales:

- **Split (EE1, EE2 ... BE2)** uses the eight levels.
- **Collapsed (EE, ME, AE, BE)** joins each pair into one level, so EE1 and EE2 both become EE.

Image — The same broadsheet on the collapsed scale

This is one setting for the whole school. Changing it changes the grades, points and ranks on every broadsheet, so agree on the scale before results are shared. Only users with permission can change it. For everyone else the box is greyed out. The mark ranges and the points for each level are set under **Configuration > Grading System**.

Comparing with an earlier examination

Choose the earlier examination in **Compare with**. The **Prev Avg Pts** and **Trend** columns appear, and the note under the table counts how many students improved, dropped or stayed the same. The choice is remembered for this examination. Choose **(No comparison)** at the top of the list to remove it.

Printing the broadsheet

Click **Preview / Export PDF**.

Image — The print preview

1. **Print** sends it to a printer.
2. **Export PDF** saves it as a PDF file you can email or print elsewhere.
3. **Zoom Out**, **Zoom In** and **Fit Width** change how large the preview looks. They do not change the printout.
4. **Orientation**. The broadsheet is laid out for A3 landscape paper.

The printed broadsheet has more than the sheet itself. After the list of students come these pages:

- **Performance Analysis:** subject statistics, grade distribution, the grading scale in use and progress since the earlier examination.
- **Stream Performance Analysis.**
- **Subject Performance by Stream**, with each subject head named beside the subject.
- **Best Students per Subject** (top 5 by points).

Image — The Performance Analysis page of the printed broadsheet

Subject heads are set under **Configuration > Subject Heads**, and subject teachers under **Configuration > Subject Teachers**.

Report Forms

Report forms (report cards) are produced from the same marks as the broadsheet, one page per student. In the program the module is called **Report Cards**.

Open it from **Report Cards** on the toolbar.

Step 1: choose the examination

Image — The Report Cards page

1. **Filters.** Narrow the list by grade, term, year or stream, then click **Filter**.
2. **Marks coverage.** Shows how much of the marking is done, and how many students in the grade have marks. Aim for 100% before you print. **Edit Marks** and **By Subject** take you straight to the marks entry screens to fill the gaps.
3. Click **Generate Reports** on the examination you want.

Step 2: choose whose reports to produce

Image — The report generator for one examination

1. **All Grade 10 Reports** builds the report forms for the whole grade in one document and opens it in the print preview. You are asked to confirm first, because a whole grade can take a little while.
2. **Stream buttons** do the same for one stream. This is the usual choice for a class teacher.
3. **PDF** beside a student's name builds just that student's report form.
4. **Save one PDF per student...** asks for a folder, then writes a separate PDF file for every student into it. Each file is named with the admission number, grade, term and year, for example `Report_8003_Grade10_Term2_2026.pdf`. Use this when reports are sent to parents one by one.

The preview works the same way as for the broadsheet: **Print** sends the reports to the printer and **Export PDF** saves them as one file. Report forms are A4 portrait.

What is on the report form

Image — A finished report form

- **School name, address and motto** at the top, with the **student's photograph** if one is on file.
- **Name, admission number, grade, stream and pathway.**
- **One line per subject** with the mark, grade, points and the subject teacher. A subject the student takes but has no mark in is shown with an X.
- **Total, average, points and overall performance.**
- **The grading scale, academic progress history** and a **points trend** chart, which fill in term by term.
- **Class teacher's and principal's comments**, with space to sign and date.
- **Parent or guardian signature** and the date the next term begins.

Where the details come from:

On the report form	Set it here
Student photograph	Admissions
Subjects and pathway	Manage Classes

On the report form	Set it here
Subject teacher	Configuration > Subject Teachers
Class teacher	Configuration > Class Teachers
School name, address, motto and principal	The school's settings

The **Grading** switch on the Broadsheet page does not change report forms. Report forms show the eight levels (EE1 to BE2), and the overall performance on the form is read from the student's average mark. Because of this, a student's overall grade on the report form can sometimes differ from the grade on the broadsheet.

When something does not look right

What you see	Likely reason	What to do
A student is missing from a mark sheet.	The student has no class this term, or the subject is not in their combination.	In Manage Classes, assign the student to the class and give them a Track ID.
A student is not in the Assign Students panel.	They already have a class this term, or the wrong year and term are chosen at the top.	Check the Year and Term , then look for the student in the class list.
Save Marks is grey.	Nothing has been changed since the last save, or your account may not enter marks.	Type a score. If it stays grey, ask your administrator.
A subject shows X on the broadsheet or report form.	The student takes the subject but no mark was entered.	Enter the mark in Marks Entry, or leave it if the student did not sit the paper.
Two students have the same rank and the next rank is missing.	This is how ties are handled: 1, 2, 2, 4.	Nothing.

What you see	Likely reason	What to do
The Grading box on the broadsheet is grey.	Your account may not change the school's grading scale.	Ask your administrator.
Prev Avg Pts and Trend are empty for a student.	The student has no result in the earlier examination.	Nothing.
The trend columns are missing altogether.	No earlier examination is chosen.	Choose one under Compare with .
A report form has no photograph.	No photo is on file for that student.	Add it in Admissions.
The teacher's name is blank on a report form.	No teacher is recorded for that subject and class.	Set it under Configuration > Subject Teachers .
The status bar shows the wrong term.	The current term has not been moved on.	Ask your administrator to set the current term before you start work.
A module is missing, or the preview says printing is not included.	Your account or the school's licence does not include it.	Ask your administrator.

The term at a glance

1. **Admissions:** admit new students and add their photographs.
2. **Manage Classes:** put every student in a class for the term and give each one a subject combination. At the start of a later term, use **Roll Term Forward**.
3. **Examinations:** create one assessment for each grade.
4. **Marks Entry by Subject:** enter and save the marks until every subject card is green.
5. **Broadsheet:** check the results, choose the grading scale and the comparison, and print.
6. **Report Cards:** check marks coverage, then generate and print the report forms.
